

WaterScope[™] Utility app

METRON

Productivity in the Palm of your Hand

WaterScope Utility is an innovative iOS and Android app tailored to the unique needs of utility operators' field teams. Drawing on Metron's decades of experience partnering with thousands of municipal utilities across North America, WaterScope Utility efficiently digitizes frontline operations, enabling teams to seamlessly record, share, and access geo-tagged data and insights, communicate with head office, and streamline workflows with intelligent alerts.

With all data dependably stored on the worker's device and automatically uploaded to central servers, WaterScope Utility provides seamless connectivity for frontline teams operating in remote locations. Central managers can determine how data is shared across workers' devices, creating a powerful on-the-go knowledge repository — complete with smart-meter data, notes, maps, and photos taken by field teams — while also ensuring that sensitive customer information is kept fully secure.

Using WaterScope Utility, field team members can identify meters with issues, see a route map, capture serial numbers when repairing or replacing meters, update GPS coordinates if not accurate, and plan their activities for the day.

WaterScope Utility features a rich set of workflows which make your field teams productive and efficient, from route planning to logging activities and capturing photos of issues and work done.

WaterScope™

Accurate, 1-minute water consumption data isn't useful unless you can understand it. That's where WaterScope comes in. With AI-powered analytics and actionable reporting, WaterScope puts utilities – and residents – in control.

Offering leak alerts, usage summaries and details, violation alerts (such as irrigating on off-days) and easy integration with billing systems, WaterScope turns water consumption data into something you can take action on.
