

WaterMasters™

Let Metron monitor your water for you

Utility operators and property managers juggle many responsibilities, and water management often competes with other pressing tasks. And while Metron's cellular based meters and WaterScope® portal simplify water management dramatically, what if your organization just isn't staffed to take that deep dive into WaterScope to realize the real value? What if Metron could just do it for all for you?

Well now we can.

WaterMasters is a subscription service where Metron's water experts will regularly take a look at the water usage data across your account and let you know what needs your attention. Examples are:

- Leaks and water losses
- Fixture failures, such as toilet flappers
- Broken meters
- Meters not reading
- Irrigation violations
- Low temperature

We will email or call you with a list of the top priorities that need to be addressed.

The Silver and Gold subscription levels also include monthly calls, where we'll work with you to discuss system performance, water losses, and actionable steps to prevent future issues. With the Gold-level service, we'll enable your field team to use the WaterScope Utility app – and we'll create work orders so they'll be productive right away.

WaterMasters Service Levels

WaterMasters is offered at three levels. Select the one that best suits your requirements.

GOLD

Gold level service

5 times a week: WaterMasters will analyze WaterScope for issues and email or call staff.

Monthly: Advisory call with utility or property management to discuss system anomalies and performance.

Licenses for the **WaterScope Utility app**. WaterMasters can optionally assign field work orders via the app.

SILVER

Silver level service

3 times a week: WaterMasters will analyze WaterScope for issues and email or call staff.

Monthly: Advisory call with utility or property management to discuss system anomalies and performance.

BRONZE

Bronze level service

3 times a week: WaterMasters will analyze WaterScope for issues and email or call staff.

WaterMasters takes the guesswork out of water management, letting you focus on other priorities while we handle the details.

What is WaterScope®?

Accurate, 1-minute water consumption data isn't useful unless you can understand it. That's where WaterScope comes in. With AI-powered analytics and actionable reporting, WaterScope puts utilities – and residents – in control.

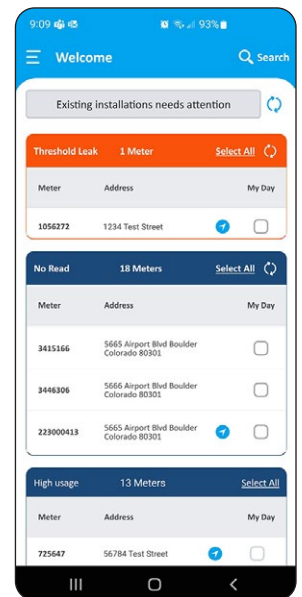

Offering leak alerts, usage summaries and details, violation alerts (such as irrigating on off-days) and easy integration with billing systems, WaterScope turns water consumption data into something you can take action on.

WaterScope Utility

WaterScope Utility is an innovative iOS and Android app tailored to the unique needs of utility operators' field teams. It efficiently digitizes frontline operations, enabling teams to seamlessly record, share, and access geo-tagged data and insights, communicate with head office, and streamline workflows with intelligent alerts.

Using WaterScope Utility, field team members can identify meters with issues, see a route map, capture serial numbers when repairing or replacing meters, update GPS coordinates if not accurate, and plan their activities for the day.
