WaterScope® for Mobile Home Parks

Water Usage Reporting and Analytics

Smart water metering for mobile home parks increases revenue, reduces water losses, improves resident relationships and increases property values. With Metron meters and submeters you're half-way there – but you need to make all that water usage data work for you. That's where WaterScope comes in.

The WaterScope Suite is your set of tools for understanding and acting on your water usage, whether you're preparing bills for your tenants, looking for leaks and infrastructure losses, or tracking revenue recapture across your portfolio of properties. WaterScope turns information into action, simplifying the business of water.

The WaterScope Suite

METRON WaterScope® CLASSIC

Designed for meter management, system status and billing integration, the industry favorite WaterScope Classic offers a deep dive into the usage data of every meter in your district or park. Ideal for utilities, park managers and more.

METRON WaterScope® PLUS

Water data turned into business intelligence. WaterScope PLUS is a sophisticated dashboard for property and portfolio managers, providing intuitive data on financial and operational performance.

METRON WaterScope® UTILITY

Designed to make field techs more productive, the WaterScope Utility app for iOS and Android allows them to identify meters with issues, see a route map, capture serial numbers when repairing or replacing meters, update GPS coordinates, and much more.
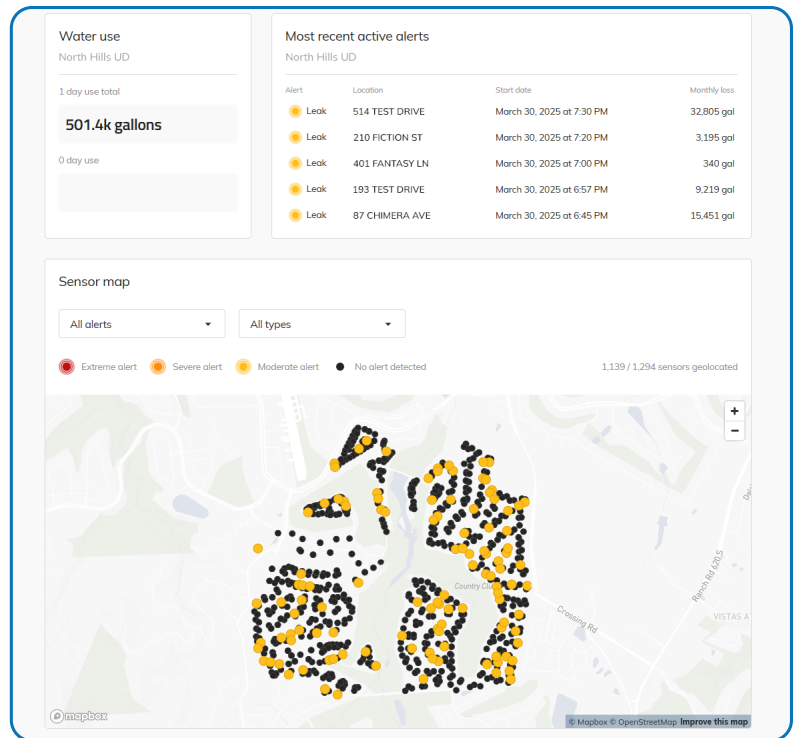

METRON WaterScope® DATALINK

We've built an API to allow application developers to access the power of WaterScope's database and analytic tools. With deep integration like this, the sky's the limit for billing, property management and ESG applications.

Park Managers

Managers of mobile home parks can use **Water-Scope Classic** in conjunction with submetering to get accurate water usage information per pad. Instead of RUBS, you can bill your tenants for exactly the amount of water they use. Additional meters can capture water use for irrigation and swimming pools. Anything not accounted for is likely to be infrastructure losses – which, now that you've identified them, can be repaired.

Benefits are:

- Fair and accurate water bills
- Leak detection per pad
- Infrastructure leak detection
- Low temperature alerts per meter
- Easy billing systems integration
- Easy Rent Manager integration

WaterScope PLUS turns water data into business intelligence.

Owners and Investors

For property owners and investors, **WaterScope PLUS** provides at-a-glance metrics across an entire portfolio of properties, letting you see how your parks are performing regarding water loss reduction and recapture rates.

Benefits are:

- Water and financial metrics, such as budget tracking
- Alerts for leaks, high usage, etc.
- Peer comparisons
- Intuitive dashboard
- Drill down from portfolio level to individual meters

Residents

Park managers can provide residents with login accounts to **WaterScope Classic** or **WaterScope PLUS**, allowing them to track their own water usage.

Benefits are:

- Empowering residents to conserve water
- Improved tenant relations
- Alerts for in-home leaks such as toilet flappers
