

WaterScope® for Water Utilities

Water Usage Reporting, Analytics and Billing

With Metron's smart meters deployed across your district in residential, commercial, industrial and educational applications, the WaterScope Suite is your set of tools for understanding and acting on your customers' water usage.

Get accurate and detailed daily reports on leaks, high usage, zero usage, unauthorized usage, infrastructure losses, freeze alerts, and more. Easy integration with any billing system means on-time billing that reflects actual water use.

WaterScope turns information into action, simplifying the business of water.

The WaterScope Suite

WaterScope® Pro

Designed for meter management, system status and billing integration, the industry favorite WaterScope Pro offers a deep dive into the usage data of every Metron meter and monitor in your district.

METRON WaterScope® PLUS

Water data turned into business intelligence. WaterScope PLUS is a sophisticated dashboard for property and portfolio managers, providing intuitive data on financial and operational performance.

WaterScope® Field Service App

Designed to make field techs more productive, WaterScope Field App for iOS and Android allows them to identify meters with issues, see a route map, capture serial numbers when repairing or replacing meters, update GPS coordinates, and much more.

METRON WaterScope® DATALINK

We've built an API to allow application developers to access the power of WaterScope's database and analytic tools. With deep integration like this, the sky's the limit for billing, property management and ESG applications.

Water Utility Managers

Powered by the largest commercial cloud platforms, WaterScope is reliable, highly-available and scalable. **WaterScope Pro's** powerful analytics and reporting features give you the tools to run your water business efficiently, with as much insight into where the water goes as you need.

Here are a few examples of what **WaterScope Pro** can do for you:

- Capture accurate usage data for every customer
- Generate billing data easily
- Identify leaks in your infrastructure
- Identify meters that aren't reading over cellular
- Find water being used at properties marked as unoccupied
- Identify residents flouting watering restrictions
- Identify residents with the most serious leaks
- Analyze usage trends, such as seasonal

Installation and Maintenance Teams

Our **WaterScope Field App** for iOS and Android streamlines your field team's activities by allowing you to easily create and assign work orders directly from reports of, for example, leaks or missed reads. Out in the field, technicians can use **WaterScope Field App** when installing and repairing Metron meters and registers, with step-by-step procedures, including taking photographs and capturing GPS locations. Replaced meters or registers are updated instantly in **WaterScope Pro**, eliminating paperwork.

Benefits are:

- Easy assignment and management of work orders
- Efficient use of technicians' time
- Instant updating of meter IDs in WaterScope Pro
- Reduction in human errors

Customers

Utilities can provide customers with individual logins to **WaterScope Pro** or **MyWaterScope**, allowing them to track their own water usage and get leak alerts.

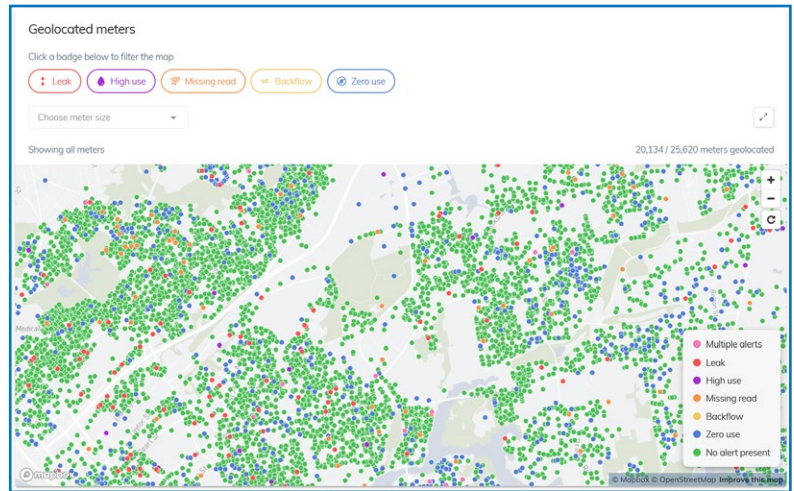

Benefits are:

- Empowering customers to conserve water
- Improved customer relations
- Leak alerts
